

HI-MACS® launches its new collection of sinks and basins

Perfect functionality and elegant design for kitchens, bathrooms and healthcare.

More than 25 years of experience in the Solid Surface market provide the foundation for the development of the new HI-MACS® shape collection: the new sinks and basins are manufactured using a high-tech casting process which ensures the highest product quality and maximum design flexibility.

The new HI-MACS® sinks and basins collection includes 18 attractive models, providing designers with numerous options for washrooms, kitchens, hospitals and more. In all cases, designers can achieve seamless and extremely hygienic installations thanks to the flush undermount design.

Alpine White worktop and combined new sinks models CS204 - CS604.

All sinks and basins from the new collection can be used in any combination, with a HI-MACS® work surface. Adding a HI-MACS® wall surface will create a super-hygienic and seamless setting.

As with all HI-MACS® products, these basins and sinks are guaranteed for 15 years, if installed by a Quality Club member, one of the longest guarantees in the solid surface market.

Pleasant haptics and beautiful optics in the bathroom: the 8 new contemporary wash basins are a perfect fit for any sized bathroom. **Shown here: Alpine White worktop and new basins model CB503.**

Hygienic and highly functional: with 7 new models suitable for healthcare, designers working in this sector have all the freedom of creativity they could ask for.

HI-MACS® by LG Hausys

www.himacs.eu

HI-MACS® is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high performance wall-cladding or kitchen, bathroom and furniture surfaces, in commercial, residential and public space projects. It is composed of acrylic, natural minerals and pigments that come together to provide a smooth, non-porous and visually seamless surface which meets the highest standards for quality, aesthetics, fabrication, functionality and hygiene – offering manifold advantages over conventional materials.

HI-MACS® provides limitless possibilities for surfacing solutions and inspires creative minds from all over the world. **Zaha Hadid, Jean Nouvel, Rafael Moneo, Karim Rashid** and **David Chipperfield**, among others, have completed fabulous projects using HI-MACS®, from kitchens to bathrooms, including decorative items, in hotels as well as in museums, shopping centres and on external façades.

LG Hausys' HI-MACS® uses a simple heating process to give three-dimensional thermoplastic forming capabilities, allows visually seamless designs, offers a virtually limitless range of colours and – for some shades - exhibits a special translucency when exposed to light. Although HI-MACS® is almost as robust as stone, it can be worked in a similar way as wood: it can be sawn, routed, drilled or sanded.

HI-MACS® is manufactured using a new generation technology, the **thermal cure**. The temperature reached during the manufacturing process sets HI-MACS® apart from other solid surfaces and creates a denser, even more homogeneous, sturdy, durable surface – with a better resistance and superior thermoforming performance.

As regards hygiene, HI-MACS® does not absorb humidity, is highly resistant to stains, and is easy to clean, maintain and repair.

Countless internationally recognized certificates attest to the quality of HI-MACS® in terms of ecological commitment, hygiene and fire resistance – being the first Solid Surface in the market to receive the official **European Technical Approval (ETA) for façades** – for Alpine White S728 colour.

HI-MACS® offers the longest warranty on the solid surface market with a 15-year warranty for products fabricated by a Quality Club Member.

HI-MACS®. Because Quality Wins.
