

Exhibits with HI-MACS® at the Salone del Mobile and Fuorisalone 2018

Not just kitchens and bathroom furnishings, but accessories and design stands: once again, HI-MACS® is at the very heart of Design Week

HI-MACS® is a solid surface hailed throughout the world of interior design and architecture for its limitless flexibility in design projects. Choosing HI-MACS® gives designers abundant possibilities for shaping the material to fit their projects, in both form and function, from tables, chairs, benches, kitchens, and baths right through to light fittings, building facades, decorative elements etc, thus allowing designers total freedom of expression.

For this reason, many international design companies have used HI-MACS® widely over the years to produce furnishings and interiors, effortlessly combining aesthetic appeal with top quality finishes.

The 2018 appointment with Design Week in Milan thus provides further confirmation of the success of HI-MACS®, which has been used in countless forms throughout the stands and also outside the show, at unmissable events.

ELMAR

Fuorisalone // Spazio MDS, via Cavallotti 15, corner via Durini

At Fuorisalone, dynamic Italian company **Elmar** will be presenting their new **Skin** kitchen design, which includes a spectacular worktop in HI-MACS®. Fashioned by **Dform srl**, the worktop has a decorative surface and contains a backlighting system.

FRANCO ECCEL

Fuorisalone // Experience Design Bed&Show, via Voghera facing civico 4

Interior furnishings and fashion accessories in environmentally sound materials designed by *Franco EcceI*, which breathes new life into production offcuts of the solid surface, will be on show at Fuorisalone at the Experience Design living showroom, Italy's first *Bed&Show*.

RASTELLI

Eurocucina // Hall 13 Stand A07 B10

At Eurocucina, **Rastelli** will be exhibiting one of its latest products, the **Karan** kitchen design by **Karim Rashid**, in **Alpine White HI-MACS®**. This solution stands resolutely at the meeting point between the designer's creative flair and the formal pure lines of architecture, yielding a magnificent result with a futuristic feel.

TRANSITIONS III

Fuorisalone // Ventura Centrale, via Ferrante Aporti 9

Tuesday to Saturday, 10 am to 8 pm. Sunday, 10 am to 6 pm

This year, once again, these young Dutch designers will amaze Design Week visitors with their innovative projects. From simulated marble textures, which are the fruit of satellite images of our planet, to lamp stands created in HI-MACS® using for the first time a handcrafted “detachment” technique, lending a completely new appearance to the material that is both warm and artistic. The Transitions III exhibition, organised by **Baars & Bloemhoff**, is undoubtedly an unmissable event at I Fuorisalone 2018.

SANWA COMPANY

Eurocucina // Hall 11 Stand C21 D20

Sanwa Company, a Japanese international company, introduces the new kitchens “**AM 01**” and “**EO 01**”, two monoblocks that fit perfectly even in the smallest places. AM 01, designed by **Atelier Mendini**, and EO 01, designed by **Elisa Ossino**, both respect the Japanese way of “living”, that enables one to conceal objects within the space. So these two kitchens can be hidden behind doors and panels, ensuring the minimalism of the surrounding space. Balance, modernism, and creativity, along with HI-MACS®, created two units that are a clear example of a study on the relation between shape and work.

HI-MACS® by LG Hausys

www.himacs.eu

HI-MACS® is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high performance wall-cladding or kitchen, bathroom and furniture surfaces, in commercial, residential and public space projects. It is composed of minerals, acrylic and natural pigments that come together to provide a smooth, non-porous and visually seamless surface which meets the highest standards for aesthetics, fabrication, functionality and hygiene – offering manifold advantages over conventional materials.

HI-MACS® provides limitless possibilities for surfacing solutions and inspires creative minds from all over the world. **Zaha Hadid, Jean Nouvel, Rafael Moneo, Karim Rashid, Marcel Wanders** and **David Chipperfield**, among others, have completed fabulous projects using HI-MACS®.

At the forefront of innovation as always, LG Hausys recently introduced two new products. First **HI-MACS Structura®**, a 3D textured panel material that takes solid surface opportunities to a new level. And now **HI-MACS® Ultra-Thermoforming**, an innovative formula that pushes the boundaries of solid surface shaping to a whole new level, with 30% more thermoplastic capabilities - the biggest innovation for the Solid Surface history since its inception in 1967.

LG Hausys' HI-MACS® uses a simple heating process to give three-dimensional thermoplastic forming capabilities, allows visually seamless designs, offers a virtually limitless range of colours and – for some shades - exhibits a special translucency when exposed to light. Although HI-MACS® is almost as robust as stone, it can be worked in a similar way as wood: it can be sawn, routed, drilled or sanded.

HI-MACS® is manufactured using a new generation technology, the **thermal cure**. The temperature reached during the manufacturing process sets HI-MACS® apart from other solid surfaces and creates a denser, even more homogeneous, sturdy, durable surface – with a better resistance and superior thermoforming performance.

HI-MACS® does not absorb humidity, is highly resistant to stains, and is easy to clean, maintain and repair.

Countless internationally recognized certificates attest to the quality of HI-MACS® in terms of ecological commitment, hygiene and fire resistance – being the first Solid Surface in the market to receive the official **European Technical Approval (ETA) for façades** – for Alpine White S728 colour.

HI-MACS® offers the longest warranty on the solid surface market with a 15-year warranty for products fabricated by a Quality Club Member.

HI-MACS®. Because Quality Wins.
