

## HI-MACS® PRODUCT LAUNCH

### 3 NEW STYLISH HI-MACS® BASINS THAT CAN BOOST ANY BATHROOM DESIGN

HI-MACS® has just extended its offering by adding 3 new versatile basins to its standard bathroom collection.

3 new slender top-mounted basins are now available – squared, rectangular and circular shaped - specially designed to sit on top of vanity units or bespoke designed top surfaces.

Mix and match is a reality, especially for renovation projects where there is a desire to combine styles and materials for an eclectic space design. The warm feeling to the touch which is characteristic of HI-MACS® and the sleek design of these basins marry perfectly with other materials and surfaces: from natural concrete, warm natural wood or vintage tiles to any other surface you desire, only your imagination is the limit.

HI-MACS® acrylic stone has excellent hygienic properties. Thanks to its non-porous surface, the material does not absorb moisture. In addition to being waterproof, it is also extraordinarily effective at repelling stains, making it easy to clean and maintain. Furthermore, it is resistant to scratches and wear. All of these properties make HI-MACS® the ideal material for bathrooms.

The collection is available in the shades Alpine White and Nougat Cream.

## HI-MACS® by LG Hausys

[www.himacs.eu](http://www.himacs.eu)

HI-MACS® is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high performance wall-cladding or kitchen, bathroom and furniture surfaces, in commercial, residential and public space projects. It is composed of acrylic, natural minerals and pigments that come together to provide a smooth, non-porous and visually seamless surface which meets the highest standards for aesthetics, fabrication, functionality and hygiene – offering manifold advantages over conventional materials.

HI-MACS® provides limitless possibilities for surfacing solutions and inspires creative minds from all over the world. **Zaha Hadid, Jean Nouvel, Rafael Moneo, Karim Rashid** and **David Chipperfield**, among others, have completed fabulous projects using HI-MACS®, from kitchens to bathrooms, including decorative items, in hotels as well as in museums, shopping centres and on external façades.

LG Hausys' HI-MACS® uses a simple heating process to give three-dimensional thermoplastic forming capabilities, allows visually seamless designs, offers a virtually limitless range of colours and – for some shades - exhibits a special translucency when exposed to light. Although HI-MACS® is almost as robust as stone, it can be worked in a similar way as wood: it can be sawn, routed, drilled or sanded.

HI-MACS® is manufactured using a new generation technology, the **thermal cure**. The temperature reached during the manufacturing process sets HI-MACS® apart from other solid surfaces and creates a denser, even more homogeneous, sturdy, durable surface – with a better resistance and superior thermoforming performance.

As regards hygiene, HI-MACS® does not absorb humidity, is highly resistant to stains, and is easy to clean, maintain and repair.

Countless internationally recognized certificates attest to the quality of HI-MACS® in terms of ecological commitment, hygiene and fire resistance – being the first Solid Surface in the market to receive the official **European Technical Approval (ETA) for façades** – for Alpine White S728 colour.

HI-MACS® offers the longest warranty on the solid surface market with a 15-year warranty for products fabricated by a Quality Club Member.
