

A modern kitchen interior featuring a prominent white countertop island with a built-in cooktop. The island is supported by a white cabinet base. In the background, a white countertop with a sink and a window is visible. The kitchen is finished with dark wood cabinetry and a ceiling with exposed wooden beams. The overall aesthetic is clean and contemporary.

2013-2014 KITCHENS PRESS KIT

HI-MACS[®] enhances any kitchen with the most innovative ideas

Innovative, elegant and long lasting

The kitchen is the heart of the family. Functionality, comfort and aesthetics are the cornerstones of every kitchen.

HI-MACS® has been designed to help you organise your time in the kitchen, and to make daily life easier.

Material with exceptional properties, indispensable for the kitchen

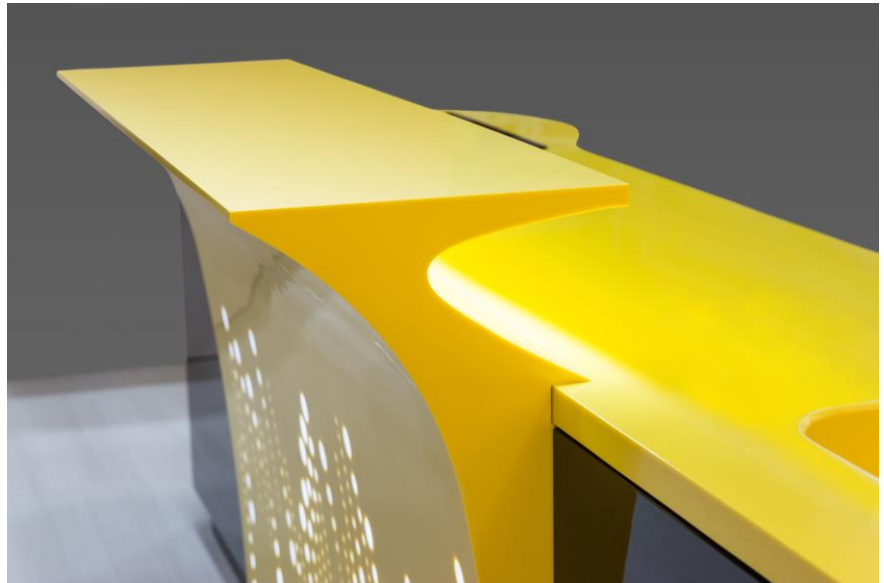

HI-MACS® stands out in every project for its elegance, functionality, technology and creative flexibility and allows the development of projects that have no limits.

Acrylic stone can be transformed into any shape, creating an infinite range of designs and exclusive finishes. The wide range of colours, its translucency, its thermoforming properties, its hard wearing nature, the ease with which it can be manipulated and cut and its

uniformity are all features that allow this stone to be worked like wood.

Thanks to its versatility and its thermoforming properties, **HI-MACS®** is essential for meeting the needs of functionality and design in a kitchen. Its smooth, non-porous surface makes it easy to clean and ensures a high degree of resistance to heat and everyday disinfectants. The kitchen is thus totally aseptic and particularly suitable for contact with food, resistant to humidity, stains, scratches and liquid penetration.

Another advantage of **HI-MACS®** is its virtually endless range of colours, with fine, brilliant and extremely elegant textures that are immediately pleasing to the eye.

BLISSFUL AND BRIGHT:

ISLAND PURE

In using extremely bold pop colours, the ISLAND PURE kitchen island is a perfect balance between elegance and innovation. Its original charm and attention to detail go flawlessly with the most avant-garde interior designs. The energetic colour of HI-MACS® Banana is used on the entire worktop as well as the breakfast bar shelf. Small lamps create beautiful lighting behind the smooth curves of the island and keep the Minimal Art aspect intact.

CREATIVE AND FUTURISTIC:

THE SKY IS THE LIMIT

THE SKY IS THE LIMIT Kitchen Island is a true work of art. When all of the doors are closed, the technical aspect of the island disappears, creating the shape of a cloud in the sky or spaceship in outer space. Its blue lines contrast to resemble the white contrails of an airplane in the blue sky. Thanks to the flexibility of HI-MACS® new generation acrylic stone, it was possible to incorporate an induction cooktop, two sinks, a tap and four drawers into the island. The top of the island unit, which opens and closes electronically by remote control, reveals a ductless range extractor. The bright HI-MACS® Lucent Opal sideboard reinforces this kitchen's innovative and stylish features. Finally, a slightly indented table is located on the opposite side of the work area for casual meals and general relaxation.

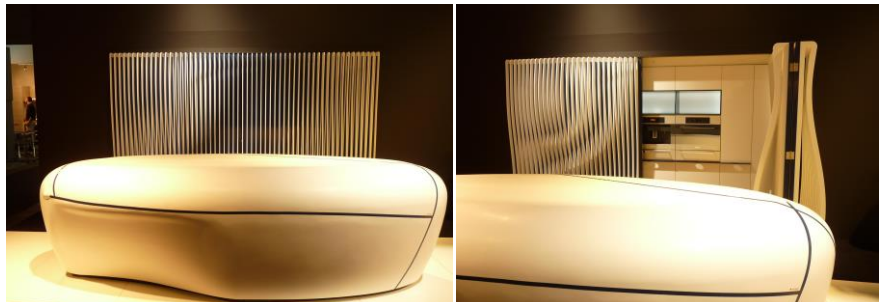

Design: Xavier Bonte

Location: Namur, Belgium

Material: HI-MACS® Alpine White, Mazarin Blue, Lucent Opal

Manufacturer: TMA-Productions

VINTAGE AND AVANT-GARDE: **AIR**

Thanks to the properties of acrylic stone, the Air kitchen by deVOL reflects the best of the last and current centuries, with a style that is both classic and timeless. The wooden structure blends with laminated aluminium end panels covering the HI-MACS® doors. Its functionality can be seen in its drawers and kitchen doors, with their handy, easy opening system.

Midnight Grey, Sky Blue, Mazarin Blue,
Light Green, Ruby and Orange

LUXURIOUS AND FUNCTIONAL **PAXMANN**

Paxmann.Design develops projects with no limits. This is why it has chosen **HI-MACS®**, to create a luxurious, futuristic kitchen that combines forms and proportions with technical and electronic devices in a uniform manner. Its bold lines defy the laws of physics and gravity, thanks to an angular surface that floats above the ground and hides drawers without handles that open and close automatically.

AN ORGANIC ISLAND: **A KITCHEN FROM ROMANIA**

A family of four from Bucharest has created a kitchen with an organically shaped island inspired by tree leaves. A white **HI-MACS®** worktop recalls the outline of tree branches, creating a welcoming, peaceful atmosphere ideal for cooking.

Location: Bucharest, Romania
Design: private kitchen

SIMPLICITY AND PRECISION: **SIMONE PIVA**

Day after day, **HI-MACS®** is becoming the perfect material for the design of indoor spaces, thanks to its hardwearing nature and the delicacy of every corner and curve. This minimalist kitchen by Simone Piva has all these features and its pale white colour blends perfectly with other materials and objects.

FUN, COLOURFUL AND FUNCTIONAL: **KANTOORLOFT**

With its solid, natural appearance Kantoorloft enriches a space with fun and colour. Its rounded edges and compact size create functionality together with design and originality. The use of **HI-MACS®** has allowed gentle finishes, enhanced by the shades of the kitchen and the structure and shape of the cupboard doors.

A CASCADE OF LIGHT: **A LOFT IN VIENNA**

In redesigning this bright, spacious loft situated in the heart of Vienna, the 36 m² kitchen has become the meeting point and communication area for the family of 5 that lives there. The island, which extends into a dining table, has a fluid design and is made entirely of **HI-MACS®**. The Alpine White shade of the whole kitchen, including the drawers, gives a feeling of cleanliness and hygiene that is fundamental in a large family kitchen.

LUXURY AND MINIMALISM: **MARU**

A minimalist outline and simple shape are the features of this kitchen made exclusively of **HI-MACS®**, a material with unique technology and detailing capability. The white colour enhances the elegance of a kitchen that combines fascinating solutions for storage with innovative work surfaces. The convex and concave modules make this kitchen unique, giving it a playful touch but also guaranteeing an excellent ergonomic quality and rendering it totally functional. The S-shaped base gives enough space for a comfortable use of the hob and the sink, which combine perfectly with the work surface.

FUTURISTIC AND ERGONOMIC: **KARIM RASHID**

The kitchens Kook and Karan, designed by Karim Rashid for Aran Cucine, are an example of simplicity and originality with a futuristic design. In the Kook model, the work surface made of acrylic stone is approx. 90 cm deep: the perfect place for all the latest generation household appliances. LED lighting created a sophisticated environment with a brilliant appearance. The Karan model enhances the dining area with its gentle curves. Both kitchens are the result of optimal design, thanks to **HI-MACS®** properties and material.

ELEGANCE AND MINIMALISM: **A LOFT IN BELGIUM**

Located in the famous Het Eilandje area of Antwerp, this loft is as elegant inside as it is outside, thanks to its curved facade designed by Joke Holvoet. Elegance is a feature in all the spaces in the home, which interact and are enhanced by the quality materials used for their construction, like durmast and latest generation **HI-MACS®** acrylic stone. The large work surface is joined to the table thanks to the properties of acrylic stone, which makes both homogeneous and uniform. The asymmetric shape of the kitchen makes it one of the most striking spaces in the home and it perfectly complements the surrounding spaces.

WHAT IS HI-MACS®?

A new generation acrylic stone, **HI-MACS®** is a material that is designed and produced by **LG HAUSYS**, a world leader in the technology sector, and distributed by **LG HAUSYS EUROPE**, based in Geneva (Switzerland).

Due to its thermoformable properties, its wide range of colours, its translucency and the invisible joins, HI-MACS® is able to provide an infinite number of designs and exclusive finishings. Moreover, this material can be worked as easily as wood as it is easy to handle and to cut.

As regards hygiene, HI-MACS® does not absorb humidity and is highly resistant to stains. Its smooth and non-porous surface means that it is not penetrated by liquids. Completely sterile, this material is easy to clean and to repair.

Unlike other similar materials on the market, HI-MACS® is the first Solid Surface to enjoy official **European Technical Approval (ETA) for façades** – for Alpine White S728 colour – which was awarded by the European Organisation for Technical Approvals (EOTA).

During the manufacturing process, HI-MACS® is heated to very high temperatures by means of an advanced firing heat treatment. This procedure makes HI-MACS® different from other types of acrylic stone, giving it better uniformity and making it more resistant to shocks and UV rays.

Acrylic stone provides infinite possibilities for personalised designs and inspires professionals from all over the world. **Zaha Hadid, Jean Nouvel, Rafael Moneo, Karim Rashid and David Chipperfield**, among others, have completed fabulous projects using HI-MACS®, from kitchens to bathrooms, including decorative items, in hotels as well as in museums, shopping centres and on external façades.

HI-MACS® is available in around 100 different colours in various ranges; **Solids, Granite, Sand, Pearl & Quartz, Volcanics, Lucent, Eden, Galaxy and Marmo**, in different thicknesses of 3, 6, 9 and 12 mm, depending on the shade. HI-MACS® holds a number of international certifications with regard to the environment, hygiene and fire resistance, such as **ISO 9001 and 14001, Greenguard, NSF, LGA and IMO MED** certification (Modules B and D), among others.

HI-MACS® stands out for its excellent quality service, guaranteed by its **Quality Club** programme, consisting of a network of expert manufacturers and approved distributors across Europe. HI-MACS® offers the longest guarantee service on the market: 15 years.
