

A splash of colour in the bathroom from Not Only White and HI-MACS®

Designed with hotel bathrooms in mind, the new bathroom accessory collection, **Stages**, which can be made in a **wide range of HI-MACS® colours**, is the ideal display for small soap and shampoo bottles and other accoutrements provided by hotel chains. The minimalistic organic shapes and pastel tones add an aesthetic and warm touch to a decor which is often considered rather ubiquitous.

Designed by Marike Andeweg for the Dutch design label **Not Only White**, the collection is simplicity itself. The new accessories are designed to complement their extensive collection of washbasins, also made with HI-MACS®, for a whole bathroom solution.

HI-MACS® is the perfect material for bathroom settings, with its warm, silky smooth feel. And the properties that make it so, also create a product which is incredibly durable, easy to clean, and totally hygienic.

Project information

Design: Marike Andeweg, Not Only White

Colours available: HI-MACS® Alpine White S028, Almond S002, Sapphire S303, Ruby S302, Coffee Brown S100, Deep Indigo S115, Festival Pink S116

HI-MACS® is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high performance wall-cladding or kitchen, bathroom and furniture surfaces, in commercial, residential and public space projects. It is composed of minerals, acrylic and natural pigments that come together to provide a smooth, non-porous and visually seamless surface which meets the highest standards for quality, aesthetics, fabrication, functionality and hygiene – offering manifold advantages over conventional materials.

HI-MACS® provides limitless possibilities for surfacing solutions and inspires creative minds from all over the world. **Zaha Hadid, Jean Nouvel, Rafael Moneo, Karim Rashid, Marcel Wanders** and **David Chipperfield**, among others, have completed fabulous projects using HI-MACS®.

At the forefront of innovation as always, LG Hausys recently introduced two new products. First **HI-MACS® Ultra-Thermoforming**, an innovative formula that pushes the boundaries of solid surface shaping to a whole new level, with 30% more thermoplastic capabilities - the biggest innovation for the Solid Surface history since its inception in 1967. Now, **HI-MACS® Intense Ultra**, combining the characteristics from two disparate worlds: **Intense Colour Technology** and **Ultra-Thermoforming**.

LG Hausys' HI-MACS® uses a simple heating process to give three-dimensional thermoplastic forming capabilities, allows visually seamless designs, offers a virtually limitless range of colours and – for some shades - exhibits a special translucency when exposed to light. Although HI-MACS® is almost as robust as stone, it can be worked in a similar way as wood: it can be sawn, routed, drilled or sanded.

HI-MACS® is manufactured using a new generation technology, the **thermal cure**. The temperature reached during the manufacturing process sets HI-MACS® apart from other solid surfaces and creates a denser, even more homogeneous, sturdy, durable surface – with a better resistance and superior thermoforming performance.

HI-MACS® does not absorb humidity, is highly resistant to stains, and is easy to clean, maintain and repair.

Countless internationally recognized certificates attest to the quality of HI-MACS® in terms of ecological commitment, hygiene and fire resistance – being the first Solid Surface in the market to receive the official **European Technical Approval (ETA) for façades** – for Alpine White S728 colour. Furthermore, HI-MACS® has obtained the French **QB certification** and **CSTB ATec “Avis Technique”** for facade applications.

HI-MACS® offers a 15-year warranty for products fabricated by a Quality Club Member.

HI-MACS®. Because Quality Wins.
