

**New Bath and Shower Tray Collection:  
Even more choices from HI-MACS® for a beautifully designed  
bathroom.**

Alongside washbasins, **baths** and **shower trays** are the central element of a beautifully designed bathroom. **And now all three components are available in the same material: HI-MACS®.** Sleek, but also functional in a useful, aesthetic design.

The three new baths are designed for integrated installation. The bath is enclosed flush-mounted within the panel, so that visually the product is seamless: no visible joins and therefore easy to maintain with hygienic surfaces. The new baths from LG Hausys are the perfect way to complete the range and make it more than just a bathroom - they transform it into an all-round feel-good experience.

The new shower trays also available from HI-MACS® offer all of these advantages and more: three simple models extend the opportunities to bring the design and functional features of the bathroom to the forefront.

The new bath and shower tray collection is made from HI-MACS®, which is a mixture of acrylic, minerals and natural pigments and which is totally colour-fast so will look as good in the years to come as it looks the day it is installed. HI-MACS® is the perfect material for bathrooms, with its warm, silky smooth feel. And the properties that make it so, also create a product which is incredibly easy to clean, and totally hygienic.

All HI-MACS® products are covered by our 15 year limited warranty.

The new HI-MACS® collection is composed of 3 new bath models and 3 new shower tray designs in the iconic shade Alpine White. Available in Europe from October.

**HI-MACS®. Because Quality Wins.**

## HI-MACS® by LG Hausys

[www.himacs.eu](http://www.himacs.eu)

HI-MACS® is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high performance wall-cladding or kitchen, bathroom and furniture surfaces, in commercial, residential and public space projects. It is composed of minerals, acrylic and natural pigments that come together to provide a smooth, non-porous and visually seamless surface which meets the highest standards for aesthetics, fabrication, functionality and hygiene – offering manifold advantages over conventional materials.

HI-MACS® provides limitless possibilities for surfacing solutions and inspires creative minds from all over the world. **Zaha Hadid, Jean Nouvel, Rafael Moneo, Karim Rashid, Marcel Wanders** and **David Chipperfield**, among others, have completed fabulous projects using HI-MACS®.

At the forefront of innovation as always, LG Hausys recently introduced two new products. First **HI-MACS Structura®**, a 3D textured panel material that takes solid surface opportunities to a new level. And also **HI-MACS® Ultra-Thermoforming**, an innovative formula that pushes the boundaries of solid surface shaping to a whole new level, with 30% more thermoplastic capabilities - the biggest innovation for the Solid Surface history since its inception in 1967.

LG Hausys' HI-MACS® uses a simple heating process to give three-dimensional thermoplastic forming capabilities, allows visually seamless designs, offers a virtually limitless range of colours and – for some shades - exhibits a special translucency when exposed to light. Although HI-MACS® is almost as robust as stone, it can be worked in a similar way as wood: it can be sawn, routed, drilled or sanded.

HI-MACS® is manufactured using a new generation technology, the **thermal cure**. The temperature reached during the manufacturing process sets HI-MACS® apart from other solid surfaces and creates a denser, even more homogeneous, sturdy, durable surface – with a better resistance and superior thermoforming performance.

HI-MACS® does not absorb humidity, is highly resistant to stains, and is easy to clean, maintain and repair.

Countless internationally recognized certificates attest to the quality of HI-MACS® in terms of ecological commitment, hygiene and fire resistance – being the first Solid Surface in the market to receive the official **European Technical Approval (ETA) for façades** – for Alpine White S728 colour. Furthermore, HI-MACS® has obtained the French **QB certification** and **CSTB ATec “Avis Technique”** for facade applications.

HI-MACS® offers a 15-year warranty for products fabricated by a Quality Club Member.
